

"Your Eyes in the Oil Patch!"

Drillsite News

A Periodic Update for Drillsite Broadcast Company Shareholders and Friends – 2 Q 2010

By Michael Dwinnell, CEO

BP Gulf Oil Catastrophe - Video no longer luxury but required in prudent drilling operations.

When Drillsite Broadcast Company first launched its live and archival video services many operators and O & G personnel saw the service as a luxury add-on tool. No longer is that the case. As an operator in today's market place you simply must have accountability in the field with supporting evidence of prudent operations. Live video supports all personnel in safety, security and accountability. It is simply a must in today's environment.

Drillsite Broadcast Company is moving full throttle in 2010 to supply the cutting edge technologies and services that we pioneered for the oil & gas drilling sector.
